Drilling Conditions
Around the World.**

DTH HAMMERS

Rock Hog's new lines of High Performance "HP" DTH hammers were introduced in early 2010. They have been field tested in a variety of drilling applications around the world and have continually proven to be the industry leader. Contact your Rock Hog Sales Representative for further details.

DTH BITS

Rock Hog engineers have developed proprietary raw material & metal treatment processes for its complete line of DTH bits that are being used in the most demanding drilling conditions around the world. Rock Hog DTH bits have proven time after time to be the industry leader for any percussion drilling application. Contact your Rock Hog Sales Representative for further details.

THREADED BUTTON BITS

Rock Hog Drilling Products is proud to introduce its new "HARDLINE" series of threaded button bits for 2010. The "HARDLINE" series is produced using proprietary manufacturing processes that are exclusive to Rock Hog. Actual field test results of Rock Hog's new "HARDLINE" series of threaded button bits have proven yet again that when the drilling gets tough, Rock Hog has the answer.
